

## A Nationwide Provider of Claims Solutions

**American Consulting Group** is an insurance claims specialty firm which offers expert assessment of the damages, develops a detailed scope of work, completes an accurate repair estimate, and negotiates with the public adjuster and/or the contractor until the claim is settled. **American Consulting Group** has expert personnel available in 48 states with a focus on quality and timely service, at an affordable price.

### Experienced Event Management

Our estimates are easily understood by all users and itemized repair sections includes notations to provide context and reasoning. Our estimates also include a detailed floor plan of the property, complete with accurate measurements that take into account missing walls, doors and windows. We incorporate multiple photos of the damage so that the reader can have an accurate understanding of what needs to be repaired.

### On-Site Evaluation

Before preparing an estimate, we perform a detailed on-site inspection of the property and damaged areas. Our inspection methods help locate hidden or overlooked damage and factors that may affect the cost of repairs. We then analyze all of the information to create an estimate that involves the proper protocol for making the necessary repairs to bring the property back to its pre-loss condition. This includes conversing with City, County, and State agencies, as well as Architects and Engineers to determine code upgrade requirements.
